Index of Subjects

Achromobacter, differentiation of, -like strains from human blood by DNA restriction endonuclease digest and ribosomal RNA gene probe patterns, 541
Aeromonas species, the incidence of virulence in mesophilic, isolated from farm animals and their environment, 277
African horse sickness, isolations of, virus from vector insects made during the 1988 epizootic in Spain, 447

Bluetongue, further studies on, and bluetongue-related Orbiviruses in the Sudan, 619
Brucellosis, specific IgE response in patients with, 571

Campylobacter, incidence of, infection in infants in western Algeria and the possible protective role of breast feeding, 73
Campylobacter jejuni, DNA restriction digest and ribosomal RNA gene patterns of: a comparison with bio-, sero-, and bacteriophage-types of United Kingdom outbreak strains, 265
Candida, enhanced detection of, in blood cultures with the BACTEC 460 system by use of the aerobic-hypertonic (8B) medium, 553
Colonization resistance, the, of the digestive tract in different animal species and in man; a comparative study, 237
Coronavirus, the time course of the immune response to experimental, infection of man, 435
Corynebacterium jeikeium, characterization of the antibody response in, septicaemias, 229
Crystal violet reactions of fresh clinical isolates of *Staphylococcus aureus* from two British hospitals, 493

Diphtheria, human antibody response to fragments A and B of, toxin and a synthetic peptide of amino acid residues 141–157 of fragment A, 457

Enterobacteriaceae, determination of colonization resistance of the digestive tract by biotyping of, 355
Escherichia coli, cell surface hydrophobicity, adherence to HeLa cell cultures and haemagglutination pattern of pyelonephritogenic, strains, 255
Escherichia coli, evaluation of numerical typing systems for, using the API 50 CH and PhP-EC systems as models, 521
Escherichia coli, extended phage-typing scheme for, O157:H7, 511
Escherichia coli populations from diabetic and non-diabetic patients with bacteraemia and faecal samples from healthy subjects – a comparative study, 533
Escherichia coli, prevalence of verocytotoxigenic, in ground beef, pork, and chicken in southwestern Ontario, 11

Faecal contamination of water and fingertip-rinses as a method for evaluating the effect of low-cost water supply and sanitation activities on faeco-oral disease transmission. I. A case study in rural north-east Thailand, 363
Faecal contamination of water and fingertip-rinses as a method for evaluating the effect of low-cost water supply and sanitation activities on faeco-oral disease transmission. II. A hygiene intervention study in rural north-east Thailand, 377
Filariasis, sex differentials in susceptibility to lymphatic, and implications for maternal child immunity, 335
Fungal, typing tools for the investigation of epidemic, infection, 1

Group A streptococci, binding of IgA and/or IgG is a common property among clinical isolates of, 87

HHV-6, the distribution of antibodies to, compared with other herpesviruses in young children, 603

Human immunodeficiency virus, serological study of the prevalence of toxoplasmosis in asymptomatic patients infected with, 415

Infectious disease, a review of outbreaks of, in schools in England and Wales, 1979–88, 419
Influenza immunization, acute upper respiratory tract viral illness and, in homes for the elderly, 609

Laboratory animals, experimental studies on the comparative infectivity and pathogenicity of *Streptococcus suis* type 2. II. Porcine and human isolates in, 479
Legionella pneumophila serogroup 1 population in Italy by monoclonal subtyping, 169
Listeria monocytogenes, a comparative study of clinical and food isolates of, and related species, 245

Meningococcal, serotype-specific outbreak of group B, disease in Iquique, Chile, 119
Meningococcal, vaccination campaign against, disease in army recruits in Italy, 579
Methicillin-resistant, outbreaks of infection with, *Staphylococcus aureus* on neonatal and burns units of a new hospital, 215
Mumps, serological study of the epidemiology of, virus infection in north-west England, 175
Mycoplasmas, elimination of, from the murine genital tract by hormone treatment, 163

Parvovirus, similarities in nucleotide sequence between serum and faecal human, DNA, 197
Pigs, experimental studies on the comparative infectivity and pathogenicity of *Streptococcus suis* type 2. I. Porcine and human isolates in, 469
'*Pseudomonas thomasii*', investigation of a pseudo-outbreak of, in a special-care baby unit by numerical analysis of SDS–PAGE protein patterns, 127
Pyridinium-type resin, removal of pathogenic human viruses by insoluble, 633

Q fever in Plymouth, 1972–88. A review with particular reference to neurological manifestations, 391

Red kidney bean poisoning in the UK: an analysis of 50 suspected incidents between 1976 and 1989, 485
Rinderpest, a serological survey of, antibody in wildlife and sheep and goats in Northern Tanzania, 203

Salmonella colonization in commercial pet turtles (*Pseudemys scripta elegans*), 307
Salmonella, diversity studies of, incidents in some domestic livestock and their potential relevance as indicators of niche width, 501
Salmonella enteritidis, international increase in: A new pandemic, 21
Salmonella, the epidemiology of, infection of calves: the role of dealers, 295
Salmonella typhimurium, phage type and DNA plasmid profile of, isolates in the area of Isernia, Italy, 317
Scabies infestation: the effect of intervention by public health education, 595
Serratia marcescens, numerical analysis of SDS–PAGE protein patterns of: a comparison with other typing methods, 107
Shigella dysenteriae, plasmid profiles of antibiotic-resistant, types 2, 3, 4, 6 and 7 isolated in Ethiopia during 1976–85, 65
Shigella, molecular epidemiology of, infection in Central Australia, 51
Shigella, plasmid profile analysis and antimicrobial susceptibility patterns of, isolates from Nigeria, 59
Shigella sonnei, molecular characterization of trimethoprim resistance in, in Sicily, 29
Shigellosis, epidemiology of, in Teknaf, a coastal area of Bangladesh: a 10-year survey, 41
Staphylococci, drug-resistant coagulase-negative skin, 95
Staphylococcus aureus, crystal violet reactions of fresh clinical isolates of, from two British hospitals, 493
Staphylococcus aureus, outbreaks of infection with methicillin-resistant, on neonatal and burns units of a new hospital, 215
Streptococcus suis, experimental studies on the comparative infectivity and pathogenicity of, type 2. I. Porcine and human isolates in pigs, 469

Streptococcus suis, experimental studies on the comparative infectivity and pathogenicity of, type 2. II. Porcine and human isolates in laboratory animals, 479

Tanzania, antibodies to some pathogenic agents in free-living wild species in, 585
Toxoplasmosis, selective antenatal screening for, and the latex agglutination test, 409
Toxoplasmosis, serological study of the prevalence of, in asymptomatic patients infected with human immunodeficiency virus, 415
Travellers, infection with bacterial enteropathogens in Swedish, to South-East Asia – a prospective study, 325
Treponema hyodysenteriae, serological grouping of, 79
Trimethoprim, molecular characterization of, resistance in *Shigella sonnei* in Sicily, 29
Turtles, salmonella colonization in commercial pet (*Pseudemys scripta elegans*), 307

Water, health effects of beach, pollution in Hong Kong, 139

Zoonotic infections in Northern Ireland farmers, 565
